Pets Missing and Found

Pets missing and found is an application that will let you search through pets that are missing or have been found. It will require users to register in order to view the missing pet or to make a posting. Overall I'm just trying to bring awareness of lost and found pets.

Wire Frames:

Login View:

Wireframe for the Login View. The layout is a horizontal rectangle with a total width of 1024 x 130. On the left, there is a placeholder box with a diagonal cross, labeled '242 x 95' and '20 px gutter' on its top and bottom edges. To the right of this box are three input fields: 'Username', 'Password', and a 'Login' button. The 'Login' button is a dark gray rectangle. The entire form is surrounded by a 32 px gutter on the left and right sides.

Wireframe for the main content area. It features a tabbed interface with three tabs: 'Nunc tincidunt', 'Proin dolor', and 'Aenean lacinia'. The 'Proin dolor' tab is selected. Below the tabs, there are three vertical lines representing content. The first line is labeled 'This tab will be the main C.T.A . with info about our site.' The second line is labeled 'This tab will give our users a taste of the current missing pets.' The third line is labeled 'This tab will display the latest found pets.' The entire content area is surrounded by a 32 px gutter on the left and right sides.

Register

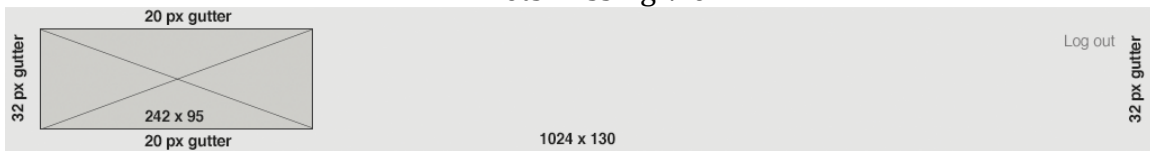

Wireframe for the Register form. It is a vertical rectangle with a total width of 360 x 375. It contains four input fields: 'Username', 'Password', 'Email', and 'Captcha'. The 'Captcha' field is a box containing the text 'Z.HVDS'. Below the input fields is a 'Submit' button. The entire form is surrounded by a 45 px gutter on the left and right sides.
